Configurar Email no Windows Live Mail

Este tutorial explica como configurar uma conta de email no software Windows Live Mail.

1- Abrir o menu **Accounts > Email**

2- Introduza o endereço de email (**Ex: teste@wincodex.pt**) e a password.

2.1- Escolha um nome para a sua conta de email (**Ex: Teste**).

Emails

Add your email accounts

If you have a Windows Live ID, sign in now. If not, you can create one later.

Email address:

[Get a Windows Live email address](#)

Password:

☐ Remember this password

Display name for your sent messages:

☒ Manually configure server settings

Most email accounts work with Windows Live Mail including
Hotmail
Gmail
and many others.

3- Server type seleccione **POP**.

3.1- Servidor de entrada será o POP3 (**Ex: mail.wincod.pt**)

3.2- Servidor de saída será o SMTP (**Ex: mail.wincod.pt**)

3.3- Authenticate using seleccione **CLEAR TEXT**.

3.4- O Logon user name é o seu endereço de email: (**Ex: teste@wincod.pt**)
